

Senior Front end Developer with 6+ years of hands-on experience designing, developing, and implementing web applications and solutions using a range of technologies and programming languages. I focus on improving my work in and out of formal educational environments.

- Designed the Front-end applications for user interactive (UI) web pages using web technologies like HTML5, CSS3, ES6 JavaScript, React/Redux Saga.
- Worked as a Front End Developer on the project with Javascript, ES6, React, Redux Saga, RESTful services, HTML5/CSS3/SASS/Bootstrap and Gitlab.
- Used React Observables to create custom components for data manipulations and to display data in company standard format.
- Achieved APIs calls from back end NodeJS using React axios.
- Developed an internal application using ReactJS, Nextjs, Express and NodeJS for Relationship Mangers.
- Implemented React-Router, React Redux architecture, ES6, web pack and Grunt to turn application into Single Page Application.
- Developed robust form management system with complete CRUD capabilities in React Native, Redux, and Firebase.
- Designed user interface screens and implemented application logic in Microsoft .NET framework using ASP.NET 3.0, C#.
- Experienced in developing web-based applications using Python, Django, QT, C++, XML, CSS, JSON, HTML, DHTML, JavaScript and JQuery.
- Developed the unit testing scripts using JEST for testing the React components using Enzyme and react test renderer.
- Expertise in creating Custom Reusable React Components Library Experienced in working with Redux architecture using complex Object Oriented concepts in improving the performance of the websites Experience in using React Js components, Forms, Events, Keys, Router, plus Redux, Animations and Flux concept.
- Database creation, integration, transform and migration
- Cloud server integration, especially Azure Services, AWS, GCP
- Content management system (CMS) development, CRM, Umbraco CMS, Kentico CMS, Microsoft Dynamic CRM 365 integration, customization, and maintenance
- Data analysis and reporting, visualization and business intelligence with Power BI

The latest completed web apps:

<https://www.kiwi.com/us/> (React.JS + Next.js + Node.JS + MariaDB+ Bootstrap + Google Analytics +AWS)

The platform supports multiple filter and search options, embedded chat, and social logins, which altogether make the solution extremely user-friendly and reliable.

<https://www.lonelyplanet.com/> (React.JS + Typescript + Node.JS +MySQL+ MUI + GTM + AWS EC2)

Software business intelligence platform that allows business users to store all the business data in one place, build business metrics, create reports, browse statistical data, and perform reliable data analyses to improve their business performance.

I have developed the Micro-service Recurring Payment Gateway with PayPal and Stripe, Send Email, Transaction, Invoice, Offer, Receipt, HR, etc in the project.

In my experience, priority has been put into teamwork, collaboration, task assigning to projects to make task segmentation and time allocation worthwhile.

I am very knowledgeable about the agile approach of doing business with daily stand-up and sprint in an iterative manner.

I look forward to demonstrating my learned capability, garnered skills, and exposure in the industry to a dynamic and challenging environment where I can contribute immensely to the success of top-notch application development.

Thank you.

Travis H.
